

Memo from  
JOSHUA LEDERBERG

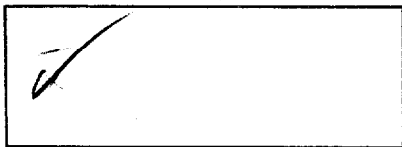

To: Sam Ayl

Dear Sam APR 27 1973

I am rather sure we will submit a proposal jointly from the Dept. of Genetics and Pediatrics covering work on metabolic idiosyncrasies of newborns as detected by GC/MS techniques.

It would be helpful if you could send me the last annual report of the NF that details the grants it has been awarding.

Many thanks  
Josh.
